- Micro Controller Based Design
- 8x16 Cross Point IC for Faster Switching
- Integrated DTMF Transceiver with Intel Micro Interface

**Centrex** is not a stereo type EPABX system, it is an advanced communication control system designed to give you complete control on your communications. Some of the following features, clearly distinguish Centrex with the best EPABX systems available.

#### **LCRxp:**

LCR (Least Cost Routing) allows you get the best of different service providers tariffs. You can configure Centrex to extract the best value from any service providers plan, e.g.: If a certain provider offers STD calls at a cheaper rate, Centrex will automatically dial using that line whenever any STD calls are made while you can sit back and count your savings.

#### **CLI Ready:**

Centrex offers you advanced CLI functionality coupled with simplicity to enhance productivity. With Centrex you can trace missed calls. The feature that was so far only on mobile phones is now available on Centrex.

Some other CLI features include:

1. Internal and external CLI display on your telephone instrument.
2. CLI number display even on call transfer.
3. CLI based call routing to route known number calls to desired extensions directly.
4. CLI report printouts on printer and PC.
5. Compatible with most CLI Phones.

#### **ACCESS AND DENY LIST:**

Centrex gives you the control to allow or deny a specific string of telephone numbers. Eg. If you want to block calls to mobile phones, then you can program the deny list with '98'.

#### **TRUNK GUARD:**

Centrex can manage your service provider locks. You can open the lock to make ISD / STD calls and Centrex remembers to lock it once you are done.

#### **POWER AUTO REDIAL:**

Centrex offers power auto redial to dial into busy numbers before any one else does.

#### **MOST USER FRIENDLY:**

Centrex is extremely easy to program, you don't require an expert and this is certified by our customers and dealers.

#### **PRODUCTS**

- 308 eco - 3 Trunk Line & 8 Extensions
- 3100 - 3 Trunk Line & 10 Extensions
- 4160 - 2 Trunk Line & 8 Extensions. (Expandable to 20 Ports)
