

PROTON

The Compact Communicator for Homes and Small Offices

Communication is of prime importance, be it a business organization, a home or a small set up.

Introducing Matrix PROTON, a compact PBX for small offices, homes, restaurants and clinics offering efficient communication and call management. Loaded with value added features, this PBX system reduces cost and enhances productivity. Its design offers robust and reliable performance.

Get the power of Matrix PROTON in your organization to boost productivity.

PROTON provides more number of extensions, so that members of your organization can communicate (externally as well as internally) more effectively and efficiently.

An easy to install and use PBX, it is loaded with features that offer more returns on your investment. Built around a Microcontroller based design and state-of-art Surface Mount Technology (SMT) ensures high reliability and low maintenance cost.

Bring that winning difference for your organization by switching to Matrix PROTON because only those grow faster who don't compromise.

■ KEY FEATURES

Abbreviated Dialing

You can store frequently used numbers in the system memory and dial it with a specific code.

Allowed and Denied List

You can specify list of numbers to allow and deny dialing for each extension. Thus avoiding misuse of extensions for local, mobile or outstation calls.

Auto Call Back

Station user need not keep dialing busy station repeatedly. By this feature you will get connected as it gets free.

Automatic Call Disconnecter

Disconnects a call once the define time is over. This function reduces long and unnecessary phone calls and keeps the expenses of telecommunication in check.

Auto Redial

Redials busy external number and notify you when it gets through. Thus saving your time and effort to call a number which is engage.

Auto Shut Dynamic Lock

A utility feature, it locks the extension for STD or any trunk after a pre-defined time, thus avoiding any misuse of the trunk lines.

Call Pick Up

By this feature you can answer the call of your colleague from your own desk without physically going to his extension.

Call Splitting

With this feature you can talk with two persons alternatively by just dialing flash.

Conference

You can have 3-party conference with extensions and trunks further enhancing team-work and better communications

Direct Inward Dialing

Frequent callers can reach desired station by dialing the station number.

External Call Forwarding

The system can be programmed such that all incoming calls are forwarded to another number. Thus not letting you miss those important calls even when the office is closed.

Executive/Secretary

With this feature you can transfer all calls for the boss through secretary.

Walk-In Class of Service

This feature allows you to make calls as per your toll control from any station.
